Is there any special medical situation with your son that the camp administration should know about? (allergies, medication, etc.) It should also be indicated on the doctor's medical form of good health.

**Important Note :**

The camp administration must be able to get in contact with the parents during the whole camping session, whether they are working, at home or on vacation. If something happens to your son or if we have problems with his behavior that necessitates his early departure from Caritas you (the parents) will be contacted by phone. If you are out of town, an alternative address and phone number that he can return to must be readily available. If we cannot reach you during the full length of your son's stay at camp, unfortunately we will not be able to accept your son's application.

**Alternative address and phone number :**

**We (the parents or legal guardians) have read all the information contained in this brochure and/or internet website. We are now aware of the camp policies, about the nature of its daily activities, its goals and aspirations. Also, if an emergency situation occurs requiring hospital treatment and we are unable to be reached by telephone, we give the camp administration permission to request and dispense such treatment.**

- A **doctor's medical form of good health** is required from each camper before the camping session starts. It is not necessary to submit it with this application.
- Upon review, the Camp Caritas administration reserves the right to refuse an application.
